PROJECT

Front and rear extensions

DESIGN SUMMARY

This refurbishment project was all about changing a developer style detached property that was very similar to those in its residential area, to a bespoke home.

The modest extensions to both the front and the rear have completely transformed this property. Careful detailing together with finish upgrades throughout have created a high end bespoke property.

The large dining space to the rear has lots of glazing which maximises daylight as well as creating visual and physical links to the garden. At first floor level an enlarged bedroom is created, the vaulted ceiling and triangular window forms an attractive addition to the rear elevation.

As part of the refurbishment all windows and doors were replaced, cavity insulation installed and render was introduced at first floor level to add visual variation and interest to all elevations. Overall, the extensions fit seamlessly with the existing property.
